

Dunkettle Progress Update

14th June 2023

[Website](#)

- We are hoping to complete and open a number of further road links on the Dunkettle Interchange Project over the summer months. In order to ensure that we keep everyone as fully informed as possible we will be issuing two updates per week for the next number of weeks.

- The updates will be issued at 12 noon on Wednesdays & Fridays.

- We have already commenced work on completing the M8 Southbound between Structure ST08 and the Interchange Roundabout. As part of these works, we have already directed the M8 Southbound onto two temporary lanes to the east of the permanent lanes. We hope to open the permanent lanes as far south as the Interchange Roundabout by the weekend.

M8 southbound approach temporary lane alignment.

- Also as part of these works, the wearing course on the southbound approach to the Tunnel was completed under night-time working this

week - see photograph below. We also hope to complete the northbound exit from the Tunnel before the weekend.

Wearing course works at the southbound entrance to the Jack Lynch Tunnel.

- The first photograph below is an aerial shot of the area south of the N25 in January 2023, with the second photograph showing the status as of today. A lot of the available offline works areas are approaching completion and the focus over the coming months will be on online areas. Motorists are again asked to pay particular attention to the posted speed limits in the interest of safety from both the motorists and construction workers point of view.

Works area south of the N25 - January 2023.

Works area south of the N25 - early June 2023.

- Further details will be issued as we go and there is an open invitation to visit the office at Inchera from 8am to 5pm, to view the model or to obtain any additional information required in relation to the Scheme - no appointment required.
